Letter of Recommendation

I am glad to get the opportunity to write this letter of recommendation for Barsenet Asfaw Yadesa to support her application for admission. Currently, I hold the designation of assistant professor at the Department of Computer Science and Engineering in Adama Science and Technology University. She had been my student for the past three years. She was a student in my Natural Language Processing and information retrieval course, which is how I first got to know her.

Barsenet Asfaw Yadesa has a strong enthusiasm for computer science and engineering and has been one of the few extraordinarily talented students I have met. She was perceived as a dedicated, diligent, and sincere student during her time at school. She is motivated to learn by her assignments, projects, and the energy with which she engages in class discussion. Her remarkable grasping ability is shown from her work. She is a social, engaging, and sophisticated student who adheres to both institutional and personal rules. Academically, she outperformed her classmates, frequently explained concepts to classmates, actively participated in discussions, and asked questions to make sure she fully understood them. Along with being diligent and considerate, she also has a charming personality, is well-mannered and charismatic, and is well-liked by her classmates and the department. She is a really good communicator. She gets along well with her classmates, whether they are in the classroom or part of a larger, more diverse student body. She is seen as a well-rounded person with a friendly disposition and a sense of humor. She is a balanced person who likes a challenge.

As you can tell by now, I am quite impressed with this outstanding young woman and give her my strongest recommendation for roles which require intelligence, communication skills, service and a positive attitude. Please, contact me if there is anything I can do on her behalf.

With regards;
